

Technical Assistance and Geotechnical Study, Beddawi

EDESSA was commissioned by Poten & Partners Inc. (Poten), a U.S. based company in the process of preparing the Terms of References for the siting of an LNG terminal in Lebanon for the benefit of the Ministry of Energy and Water (MoEW) and the Council for Development and Reconstruction (CDR), to provide environmental, geotechnical and geological technical assistance for the construction and operation of a Floating Storage and Regasification Unit (FSRU) LNG offshore Beddawi.

The technical assistance included a geological and geotechnical study of the Beddawi area and also included the review of the Tripoli Port geotechnical study.
