

# Remediation of Berka Zergha Dumpsite, Annaba, Algeria

EDESSA assisted the Averda Group in the consultancy for the **Remediation of Berka Zergha dumpsite** in Annaba, **Algeria**.

The project consisted of the remediation of the existing dumpsite including the excavation and transfer of 190,000 m<sup>3</sup> of wastes existing outside the profile of the dumpsite.

The project also included the design, construction and operation of a biogas flaring system.
