

Assessment of a Beach Hotel Massawa, Eritrea

EDESSA was retained by [Qatari Diar](#) to conduct a site assessment of the [Red Sea Hotel](#) located on the outskirts of the old town of [Massawa](#) in [Eritrea](#). The objective of site assessment was to assess the upgrade potential of this facility into a 5-star international business hotel and resort facility. The site assessments included a review of satellite imagery, site visits and evaluation of the site surrounding areas. The analysis focused on the impact of the surrounding land use on the site, the impact of on-going activities, the evaluation of the existing structures, the geological and geotechnical setting of the site and the requirements in terms of infrastructures and utilities to service the site.
