

Engineering Studies – Mixed Used Development in Sana'a, Yemen

EDESSA was retained by [Qatari Diar](#) to prepare the engineering studies related to a mixed-used development project of 440,000m² in [Sana'a, Yemen](#). The site is located on a distinct promontory known as Faj Attan in the Capital city of Sana'a.

The project is included residential, commercial, retail and hotel space. EDESSA's role focused on access roads, infrastructure and utility requirements for this project. We also focused provided technical input on the location of underground parking structures based on the hard volcanic rock existing on-site.
