

# Strategic Environmental Assessment (SEA) Mirfa' Western Region, UAE

EDESSA has been commissioned by The Abu Dhabi Urban Planning Council (UPC) to conduct a Strategic Environmental Assessment of the Physical Framework and Master Plans currently under development for Al Mirfa region.

The ultimate goal of the project is to develop first class master plans for each of the settlements. The SEA and Master Planning process run in tandem and are integrated to the extent that the outputs of the SEA are aligned with the inputs to the Master Plan which leads to early collaborative agreement thereby avoiding delays, reducing costs and ultimately gaining approval of the plan sooner than if the SEA and Physical Framework and Master Plan process were carried out in series. The project included five main components as follows:

- Preparation of the Terms of Reference (ToR)
- Preparation of the Strategic Environmental Assessment (SEA) Framework
- Scoping Report
- Assessment of Alternatives Report
- SEA Environmental Report
