

# Renovation of a private Villa Awkar, Lebanon

EDESSA was retained by a private client to undertake renovation works for a private Villa in Awkar, Lebanon.

The scope of work mainly consisted of the following:

- Addressing the waterproofing issue throughout the villa,
- Installing a new VRV air conditioning system,
- Ensuring that all electrical points are operational,
- Ensuring all bathrooms are operational,
- Ensuring all kitchens (existing and new ones) are operational,
- Ensuring all wooden shutters are operational and painted,
- Ensuring all internal doors including doors leading to the outside are operational,
- Ensuring that the doors of all wardrobe units are operational,
- Painting of all interior walls and wooden doors,
- General cleaning of all floors.

This was a fast track project where the EDESSA team was able to complete the above-mentioned works in record time, avoiding Safety risks, accidents and injuries, while ensuring high quality finishing and client's satisfaction.
