

Existing Palmyra Airport , Syria

EDESSA was retained by **Qatari Diar** and the **Governorate of Homs** to an evaluation of the environmental, vibration, noise and accidental impact of the existing military airbase of Palmyra on the historical roman ruins of the city.

EDESSA teamed with three large US Consulting Firms - Gensler, Norris Design, Simpson Gummertz & Heger and S.A. Miro - for the technical evaluations and with Solving international for the market study.
